Our Expertise

01 Enabling the transition to net zero

Renewable Energy

With over 30 years experience in the design and development of key energy led technologies such as Solar, Battery, EV, Gas and Hydrogen, Greenfield's specialist team are well placed to identify, invest, design and develop projects across the UK & Europe.

Sustainable Investing

In partnership with market leading investors and development partners, Greenfield's investment team look to harness opportunities across land, residential and commercial real estate alongside building long term revenues through both sustainable and renewable led assets.

Solar

02 Powering Tomorrow's World, Today

Turn-Key Solution

In partnership with one of Europe's largest owner and operators of renewable energy assets, the Greenfield team have delivered over 500MW of energized projects, and as the UK's green target continues to grow, so do our aspirations for a cleaner, greener UK.

"At Greenfield we're at the forefront of supporting both landowners and large commercial users to move towards a greener, more independent UK. Science has proven that solar plays a pivotal role in this."

David Ring – Director

Battery Storage

03 Increasing Energy Independence

Transitioning The Grid

As the UK becomes more heavily reliant on renewable technology and more importantly, how we manage this energy, Battery Storage acts as a significant balancing solution. Our specialist team will always look to harness Battery Storage alongside Solar or as standalone technology.

Landowner Benefits

- Minimum 2-5 acres required
- Market Leading Land Rates
- Land Rent Payable between 25-40yr term
- Combine with EV and Solar
- Site Fully Maintained/Monitored 24/7

Experience That Counts

- Over 200MW of UK Battery Storage Sites Energised
- Experience managing utility scale solar projects in the UK
- Utilising Market Leading Technology
- Bespoke Battery Storage for Landowners and Commercial Estates

Electric Vehicle Charging

04 Meeting The Demand For Future Travel

General Overview

'Full Turn-Key Approach'

With over 10 years' experience working across major brands such as BMW, Porsche, Tesla and Schneider Electric, the Greenfield team provide a full design and delivery approach to your EV charge point needs.

Capex Solution

Whether you're a commercial business looking to extend your charging capability for your staff or fleet, or a retail park looking at ways to capitalise your parking spaces for electric vehicles, Greenfield can design and develop an EV charge point solution that meets those demands and provides you a long-term income stream.

Fully Funded Solution

If you'd like to provide your staff or customers with an EV charging solution but don't want the upfront cost, Greenfield can provide a fully designed, installed and managed solution at no cost, and in return Greenfield manage and operate the charging on your behalf. A simple solution that works for you.

Hydrogen Power

05 Transitioning the UK's Fuel Supply

Powering The Future

Hydrogen will be the world's future supply of fuel and be the engine that keeps the world moving in a sustainable, clean way. Through our partnership with market leading Hydrogen technology, Greenfield are at the forefront of the UK's transition from fossil fuels to green gas, by harnessing both our existing solar and battery sites, alongside supporting key areas of the UK where demand to transition to cleaner fuel is imperative.

Did you know

By utilising Hydrogen as a viable replacement to fossil fuels such as oil and traditional gas, the UK can move a step closer to achieving Net Zero by 2050!

Sustainable Development

06 Building Through Innovation

A Sustainable Future. From The Ground Up

We believe in a greener future. A future where renewable technology and sustainable living should intertwine. That's why Greenfield are always striving to connect our renewable projects with sustainable development, from the ground up. From identifying land, acquisitions, modern design and sustainable development, all under one green roof.

Impact Investing

07 A Greener Future, Worth Backing

Investing Today For A Greener Tomorrow

Greenfield Investment Areas

- Renewable Energy Technologies
- Real Estate Development
- Project Development Investment
- Land & Asset Acquisitions

Whether you're a landowner looking to harness renewable technology, commercial client looking for sustainable solutions for your business or you require investment for your project, get in touch today and we can discuss your requirements.
